

## Teacher

### School Description

We are reinventing high school with the launch of Purdue Polytechnic High School in August 2017. Our Core Principles of Personalized Learning, Project-based Learning, Academic Progress, Career Pathways, and People guide all that we do. Student academic work is driven by projects, and instruction is based solely on the individual and collective needs of students. There are no pre-determined classes where students move in groups according to a master schedule. Rather, teachers work together to arrange time for student instruction based on who needs it, when they need it, and how they best receive it.

### Mission

To create an environment of academic excellence characterized by industry-focused experiential learning; mentors who nurture, guide and trust; and students who develop a natural thirst to learn in preparation for their lifelong journeys.

### Vision

To develop a new generation of skilled talent by seamlessly transitioning graduates from high school to college and high-tech, high-wage jobs.

### Summary

Teachers of Purdue Polytechnic High School will facilitate an academic experience with social supports tailored specifically to the needs of students. Teachers and students work together to schedule time for instruction, which can occur individually, in small groups, or in large groups depending on the learning styles of the students. Fulfilling the role as a personal learning coach, teachers will encourage students to demonstrate high levels of social responsibility, personal accountability, and independent thinking. Through design-based problems and projects teachers will facilitate student learning in a variety of formats to master Indiana state standards, pass state high school graduation exams, and meet college requirements.

### Education

- Bachelor's degree in subject specialty required. Prefer a minimum of 2 years teaching experience.

### Qualifications

- Current Indiana Teaching Certification in subject specialty, dual licensure preferred.
